

## Sanctuary Stimulation

Sanctuary Stimulation aids in the release of plant nutrients in a high saline environment. For best results, this product should be used in conjunction with gypsum or other products containing calcium. This product can be applied anytime to actively growing turf. The Sanctuary Stimulation is effective for golf courses, sports turf, and lawn care that are grown in soil conditions with elevated sodium levels.

### DIRECTION FOR USE

**For Use on Turf:** Sanctuary Stimulation can be applied at a range of rates from 1 to 3 oz/M. Apply the higher rate when the turf is showing a high level of stress or the effects from elevated sodium levels. For optimum results, the product is best applied in 50 to 100 gallons of water per acre. Repeat applications as moisture or temperature condition require.

**Spray Adjuvant containing 3% Fractured Natural Polyhydroxy Acids**

### WARRANTY AND LIMITATIONS

The Sanctuary, Inc. warrants that this material conforms to the nutrient description on the label and is reasonably fit for these applications, when this material is used in strict accordance with the mixing instructions and directions for use under normal conditions. The Sanctuary, Inc. makes no other express or implied warranties or representations, including any other express or implied warranty of fitness or merchantability. No employees or representative of The Sanctuary, Inc., or its distributors is authorized to do so, unless such change is made in writing with a specific reference to this warranty, and signed by an Officer of The Sanctuary, Inc. at its Home Office. Such warranty shall be limited to direct damages, and shall not include any consequential, personal or commercial damages.
