

SANCTUARY TDN[®]

16-0-4 FAIRWAY GRADE

SANCTUARY TDN[®] 16-0-4 delivers excellent residual color and growth for all turf types including golf, lawn care and sports turf. This product is ideal in areas where phosphorus is restricted. The application rate is 4 bags per acre for 8 to 12 weeks of residual growth and color. For improved stress and disease management, the rate is 2 bags per acre per month during hot weather.

SANCTUARY BENEFITS

.....

- 1 Delivers the Agronomic Benefits from MU, Ammonium Sulfate and Protein Meal**
- 2 Delivers 8 to 16 Weeks of Residual Color, Growth and Wear Tolerance**
- 3 Promotes Recovery and Rooting After Mechanical Renovation**
- 4 Contains 65% Organic Ingredients to Build Soil Life and Health**
- 5 Contains No Phosphorus and Delivers a TDN Value of 48 to 50**

*5.3% slowly available nitrogen from feather meal, fish meal and methylene urea.

DIRECTIONS FOR USE ON FAIRWAYS

MAINTENANCE RATE: For excellent residual color and slow growth, the application rate is 4 bags per acre for 8 to 12 weeks of residual growth and color. For improved stress management, the rate is 2 bags per acre per month during hot weather.

AERATION & LATE FALL PROGRAM: These applications provide an excellent opportunity to add life and energy back into the soil. The application rate is 4 bags per acre.

BERMUDAGRASS PROGRAM: For residual color and enhanced nutrient management, the application rate is 3 bags per month, especially, during times of stress. The product is ideal for winter application on Bermudagrass at a rate of 4 bags per acre for 12 weeks of color.

TEE RECOVERY PROGRAM: For improved turf recovery, the application rate is 4 bags per acre per month. This will improve the overall playability and quality of the tees.

TDN VALUE (TOTAL DIGESTIBLE NUTRIENT VALUE)

Natural fertilizers stimulate the soil microbes due to their nutritional value or TDN Value. The higher the TDN value - the greater the impact on agronomic results.
