### TDN VALUE (TOTAL DIGESTIBLE NUTRIENT VALUE)

TDN Value is the digestible energy derived from the natural ingredients in this product. This energy is released by the native soil microbes which increases their soil activity. This TDN energy value is exclusive to natural ingredients used in this product. The higher the TDN value, the more energy that is in the product. This released energy is the unique agronomic benefits derived from using natural fertilizer products. For example, all traditional fertilizers have a 0 TDN value and 100% manure products have around a 20 TDN value.

### DIRECTIONS FOR USE

#### NEW SEED:

**Application Rate:** Apply 12.5 lbs/M that should be incorporated into the top 2 to 4 inches of the soil.

#### NEW SOD:
