

SANCTUARY TDN[®]

12-0-12 GREENS GRADE

SANCTUARY TDN[®] 12-0-12 is a premium quality turf product for golf course and sports turf management. This product combines traditional and organic ingredients to address the wear and stress problems of high quality turf. This product delivers excellent residual color, turf density, rooting and hot weather recovery. The granulation is sand-like in size which eliminates the roll-up issues of organic fertilizer products. This is a 40 SGN product ideal for short cut greens.

GUARANTEED ANALYSIS

Total Nitrogen (N).....	12.0%
3.0% Ammoniacal Nitrogen	
3.0% Urea Nitrogen**	
6.0% Water Insoluble Nitrogen*	
Soluble Potash (K ₂ O).....	12.0%
Calcium (Ca).....	3.0%
3.0% Water Insoluble Calcium	
Magnesium (Mg).....	0.5%
0.5% Water Soluble Magnesium	
Iron (Fe).....	0.5%
0.5% Water Soluble Iron	

Derived from Hydrolyzed Feather Meal, Ammonium Sulfate, Methylene Urea, Urea, Potassium Sulfate, Iron Sulfate, and Magnesium Sulfate.

*6.0% Slowly available Nitrogen derived from Feather Meal, Methylene Urea.

**3.0% Stabilized Urea derived from Dicyandiamide and N-(n-butyl) Thiophosphoric Triamide

DIRECTIONS FOR USE ON GREENS

SUMMER NUTRITION:

Apply monthly at a rate of 3.5 lbs/M during the golf season to promote soil health benefits that enhance overall turf quality during all type of weather conditions. This program provides a base feed for microbial stimulation, that can be complemented with the use of liquid products.

TURF RECOVERY:

Sanctuary can be applied any time when the turf is under stress. The applied range of rate is based on the severity of the problem. For disease, wear and stress issues, the rate is 4 lbs/M. For extreme turf issues, the rate can be safely increased to 6 lbs/M. This higher rate is recommended after Aeration to promote healing and turf recovery.

DORMANT FEED :

In the late fall, Sanctuary can be applied at a rate of 6 lbs/M for rooting, recovery, winter stress tolerance and spring green up.

TDN VALUE (TOTAL DIGESTIBLE NUTRIENT VALUE)

TDN Value is the digestible energy derived from the natural ingredients in this product. This energy is released by the native soil microbes which increases their soil activity. This TDN energy value is exclusive to natural ingredients used in this product. The higher the TDN value, the more energy that is in the product. This released energy is the unique agronomic benefits derived from using natural fertilizer products. For example, all traditional fertilizers have a 0 TDN value and 100% manure products have around a 20 TDN value.
