

# SANCTUARY TDN<sup>®</sup>

## 18-2-6 FAIRWAY GRADE

SANCTUARY TDN<sup>®</sup> 18-2-6 is homogenous organic based product that combines the release characteristics and benefits of multiple nitrogen sources. These nitrogen sources include ammonium sulfate, methylene urea and nitrogen from protein meals. This multiple nitrogen release approach provides good residual color and a cost effective organic based product for fairway applications for all turf types.

### GUARANTEED ANALYSIS

Total Nitrogen (N)..... 18.0%  
 5.35% Ammoniacal Nitrogen  
 5.15% Water Soluble Nitrogen  
 7.50% Water Insoluble Nitrogen\*

Available Phosphate (P2O5) ..... 2.0%  
 Soluble Potash (K2O)..... 6.0%

Derived from Feather Meal, Fish Meal, Bone Meal, Methylene Urea, Ammonium Sulfate, Diammonium Phosphate and Potassium Sulfate.

\*7.5% slowly available nitrogen from feather meal, fish meal and methylene urea.

### TDN VALUE (TOTAL DIGESTIBLE NUTRIENT VALUE)

TDN Value is the digestible energy derived from the natural ingredients in this product. This energy is released by the native soil microbes which increases their soil activity. This TDN energy value is exclusive to natural ingredients used in this product. The higher the TDN value, the more energy that is in the product. This released energy is the unique agronomic benefits derived from using natural fertilizer products. For example, all traditional fertilizers have a 0 TDN value and 100% manure products have around a 20 TDN value.

### THE SANCTUARY DIFFERENCE - TOTAL DIGESTIBLE NUTRIENT VALUE<sup>®</sup>

### DIRECTIONS FOR USE

**FAIRWAY MAINTENANCE RATE:** For excellent residual color and slow growth, the application rate is 4 bags per acre for 8 to 12 weeks of residual growth and color. For improved stress management, the rate is 2 bags per acre per month during hot weather.

**AERATION & LATE FALL PROGRAM:** These applications provide an excellent opportunity to add life and energy back into the soil. The application rate is 4 bags per acre.

**BERMUDAGRASS PROGRAM:** For residual color and enhanced nutrient management, the application rate is 3 bags per month, especially, during times of stress. The product is ideal for winter application on overseeded Bermudagrass at a rate of 4 bags per acre for 12 weeks of color.

**TEE RECOVERY PROGRAM:** For improved turf recovery, the application rate is 4 bags per acre per month. This will improve the overall playability and quality of the tees.

### SPREADER SETTINGS

Spreader settings are an initial guideline for calibrating the spreader.

N RATE	LBS./1000 SQ FT	LELY	VICON
1.00	5.5	5	46
.50	2.75	3	41
