

SANCTUARY LAWN CARE

SANCTUARY TDN[®]

16-0-4 STANDARD GRADE

SANCTUARY TDN[®] 16-0-4 is a quality turf product for all grass types. This product combines traditional and organic ingredients to deliver excellent residual color, turf density, and recovery. This product contains calcium for calcium deficient soil types, an aid to salt management and to promote microbial life.

SANCTUARY BENEFITS

.....

- 1** Delivers the Agronomic Benefits from MU, Ammonium Sulfate and Protein Meal
- 2** Delivers 8 to 16 Weeks of Residual Color, Growth and Wear Tolerance
- 3** Promotes Recovery and Rooting After Mechanical Renovation
- 4** Contains 65% Organic Ingredients to Build Soil Life and Health
- 5** Contains No Phosphorus and Delivers a TDN Value of 48 to 50

THE SANCTUARY DIFFERENCE - TOTAL DIGESTIBLE NUTRIENT VALUE[™]

SANCTUARY LAWN CARE

16-0-4 STANDARD GRADE

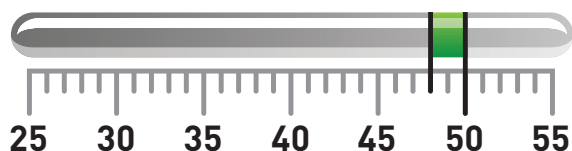

GUARANTEED ANALYSIS

Total Nitrogen (N).....	16.0%
0.5% Ammoniacal Nitrogen	
10.2% Water Soluble Nitrogen	
5.3% Water Insoluble Nitrogen*	
Soluble Potash (K ₂ O).....	4.0%
Iron (Fe).....	1.0%
1.0% Water Soluble Iron (Fe)	

Derived from: Feather Meal, Fish Meal, Methylene Urea, Ammonium Sulfate, Ferrous Sulfate and Potassium Sulfate.

*5.3% slowly available nitrogen from feather meal, fish meal and methylene urea.

TDN VALUE (TOTAL DIGESTIBLE NUTRIENT VALUE)

TDN Value is the digestible energy derived from the natural ingredients in this product. This energy is released by the native soil microbes which increases their soil activity. This TDN energy value is exclusive to natural ingredients used in this product. The higher the TDN value, the more energy that is in the product. This released energy is the unique agronomic benefits derived from using natural fertilizer products. For example, all traditional fertilizers have a 0 TDN value and 100% manure products have around a 20 TDN value.

DIRECTIONS FOR USE

MAINTENANCE RATE: For excellent residual color and slow growth, the application rate is 4 bags per acre for 8 to 12 weeks of residual growth and color. For improved stress management, the rate is 2 bags per acre per month during hot weather.

AERATION & LATE FALL PROGRAM: These applications provide an excellent opportunity to add life and energy back into the soil. The application rate is 4 bags per acre.

BERMUDAGRASS PROGRAM: For residual color and enhanced nutrient management, the application rate is 3 bags per month, especially, during times of stress. The product is ideal for winter application on overseeded Bermudagrass at a rate of 4 bags per acre for 12 weeks of color.

TEE RECOVERY PROGRAM: For improved turf recovery, the application rate is 4 bags per acre per month. This will improve the overall playability and quality of the tees.
