DIRECTIONS FOR USE

FAIRWAY MAINTENANCE RATE:

For excellent residual color and growth for all turf types, the application rate is 4 bags per acre for 8 to 12 weeks of residual growth and color. For improved stress management, the rate is 2 bags per acre per month during hot weather.

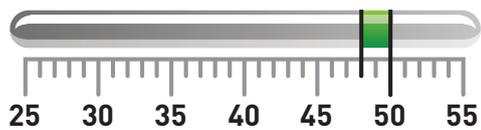

AERATION & LATE FALL PROGRAM:

These applications provide an excellent opportunity to add microbial life and energy back into the soil. The application rate is 4 bags per acre.

TEE RECOVERY PROGRAM:

For improved turf recovery, the application rate is 2 bags per acre per month. This will improve the overall playability and quality of the tees.

TDN VALUE (TOTAL DIGESTIBLE NUTRIENT VALUE)

TDN Value is the digestible energy derived from the natural ingredients in this product. This energy is released by the native soil microbes which increases their soil activity. This TDN energy value is exclusive to natural ingredients used in this product. The higher the TDN value, the more energy that is in the product. This released energy is the unique agronomic benefits derived from using natural fertilizer products. For example, all traditional fertilizers have a 0 TDN value and 100% manure products have around a 20 TDN value.
