

SANCTUARY TDN[®]

RESILIENCE

SANCTUARY RESILIENCE is the next generation of turf nutrient products that delivers an “Inducted Systemic Resistance” (ISR) for turf health. This product is a unique blend of ingredients that delivers both nutrients and energy. This product provides the energy to drive ADP to ATP within the plant’s Krebs Cycle. This energy helps to translocate these nutrient within the turf to enhance heat, wear and disease related stress problems. This product safely promotes turf recovery under the most severe of weather conditions. In addition, Resilience has a true foliar absorbed product with a low pH to help buffer spray tank water quality. Due to this low pH, Resilience can improve the tank life on pest control products. Resilience is an effective “Plant Health” product for quality turf.

SANCTUARY BENEFITS

- 1 Enhances Ball Mark and Turf Recovery**
- 2 Reduces Recovery Time After Mechanical Renovation & Aeration**
- 3 Improves Root Development & Regeneration in All Weather Conditions**
- 4 Promotes Turf Resilience & Stress Tolerance in Hot Weather**
- 5 Provides the Energy Required for Photosynthesis**

GUARANTEED ANALYSIS

Total Nitrogen (N).....	4.0%
<i>4.0% Ammoniacal Nitrogen</i>	
Available Phosphate (P ₂ O ₅)	8.0%
Soluble Potash (K ₂ O).....	4.0%
Calcium (Ca).....	5.0%

Calcium Nitrate, Phosphoric Acid & Potassium Phosphate.
Non Nutrient: Contains Simple and Complex Carbohydrates.

TDN VALUE (TOTAL DIGESTIBLE NUTRIENT VALUE)

Natural fertilizers stimulate the soil microbes due to their nutritional value or TDN Value. The higher the TDN value - the greater the impact on agronomic results.

Traditional Fertilizer.....0 TDN

Bio Solid Fertilizer2 TDN

Poultry Litter Fertilizer20 TDN

Protein Meal Fertilizers....80 TDN

DIRECTIONS FOR USE

MONTHLY MAINTENANCE: Sanctuary Resilience is applied at rates of 2 to 4 qts/A to actively growing turf for general turf health. The product is best applied in 30 to 60 gallons of water per acre. Repeat applications on a 30-day interval for optimum results.

WEAR & STRESS MANAGEMENT: Sanctuary Resilience is applied at rates of 2 qts/A every 10 to 14 days during period of extreme wear, drought or stress problems. The product is best applied in 30 to 60 gallons of water per acre. Repeat applications until stress conditions subside.

DISEASE MANAGEMENT: Sanctuary Resilience is applied at rates of 4 qts/A every 14 to 21 days during periods of extreme disease pressure. This product can be combined with fungicides to enhance performance. Please jar test prior to mixing to check compatibility.

BALL MARK RECOVERY: Sanctuary Resilience is applied at rates of 2 qts/A to actively growing turf during the growing season. The product is best applied in 30 to 60 gallons of water per acre. Repeat application on a 30-day interval for optimum results.
