

SHOOT

Powered by The Sanctuary

Sanctuary Shoot is a spray adjuvant that promotes “Induced Systemic Resistance” (ISR) for plant resilience. This product delivers energy to enhance nutrient uptake and the translocation of nutrients within the plant. This approach promotes heat, drought and disease stress resilience. Plus, this product is an outstanding water-buffering agent to lower the water pH in the spray tank. This product extends the tank life of pest control products plus enhances their performance.

BENEFITS

- **Delivers Energy to Promote Photosynthesis and Carbohydrate Production**
- **Buffers Water Quality to Enhance Tank Life of Pest Control Products**
- **Promotes Bloom Set and Flower Intensity**

DIRECTIONS FOR USE

Sanctuary Shoot is applied at 2 oz/M to 4 oz/M. This is a foliar absorbed product that is best applied in 0.5 gal/M or 1.0 gal/M of water 21 days after establishment. This can also be applied at 21-day intervals throughout the growing season.

WARRANTY AND LIMITATIONS

The Sanctuary, Inc. warrants that this material conforms to the description on the label and is reasonably fit for these applications, when this material is used in strict accordance with the mixing instructions and directions for use under normal conditions.
