

Sanctuary Stimulation

Sanctuary Stimulation was developed to improve nutrient availability in soil types that range in pH levels from 5.5 to 9.5. This product contains high-energy nutrition to build soil microbial populations. By building these microbial populations, this can improve nutrient uptake especially during periods of weather and disease stress. This product can ideally be used after fungicide applications to reduce their negative impacts of these microbial populations. Lastly, this product aids with water infiltration and sodium management when used in conjunction with gypsum. This product can be applied anytime to actively growing turf that is under stress. Stimulation is an effective product for golf courses, sports turf, and lawn care applications that have elevated sodium levels.

DIRECTION FOR USE

For Use on Turf: Sanctuary Stimulation can be applied at a range of rates from 1 to 3 oz per 1,000 sq ft. Apply the higher rate when the turf is showing a high level of stress or the effects from elevated sodium levels. For optimum results, the product is best applied in 50 to 100 gallons of water per acre. Repeat applications as moisture or temperature condition require.

Spray Adjuvant containing 3% Fractured Natural Polyhydroxy Acids

WARRANTY AND LIMITATIONS

The Sanctuary, Inc. warrants that this material conforms to the nutrient description on the label and is reasonably fit for these applications, when this material is used in strict accordance with the mixing instructions and directions for use under normal conditions. The Sanctuary, Inc. makes no other express or implied warranties or representations, including any other express or implied warranty of fitness or merchantability. No employees or representative of The Sanctuary, Inc., or its distributors is authorized to do so, unless such change is made in writing with a specific reference to this warranty, and signed by an Officer of The Sanctuary, Inc. at its Home Office. Such warranty shall be limited to direct damages, and shall not include any consequential, personal or commercial damages.

CAUTION: KEEP OUT OF THE REACH OF CHILDREN

Weight: 30 Lb (14.6 Kg) per jug
