

PREVENTION

Powered by The Sanctuary

Sanctuary Prevention is a 2-product solution that addresses - Turf Quality and Soil Health. Sanctuary Prevention addresses the critical aspect of building microbial life to tired soils. Tired soil is a biological system that has been depleted of its healthy, active microbial system. A microbial system is the life and breath of a healthy soil ecosystem that sustains soil health and turf quality during periods of stress and disease outbreaks. By building soil health, we reduce the many stress and disease related problems that are common to tired biological soil systems.

CAUTION: KEEP OUT OF THE REACH OF CHILDREN

NET WEIGHT: 50 LBS (22.4 KG)

Exclusively Manufactured For:

The Sanctuary • PO Box 2330 • Lady Lake, FL 32158
