## Case History: Detonation (RGA) Boost Growth of Orchids in Jacksonville, Florida

*RGA treated Orchids: Cattleya on the left, and Dendrobium on right*

Orchids treated with **RGA** show greatly **improved growth and health** as compared to traditional treatments in Jacksonville, Florida.

The benefits of using **RGA** microbes on Orchids are as follows:

- Accelerated root growth
- Accelerated top growth promotion
- New growth color is much greener and overall plant appearance is greatly enhanced
- Outstanding recovery of stressed and failing orchids
- Overall plant health improved making plant more resistant to adverse stress conditions

Species treated included: *Oncidium*, *Cattleya*, *Phalaenopsis*, *Vanda*, *Epipedrum*, *Paphpedium*, and *Dendrobium*.
