

DETONATION

Powered by The Sanctuary

AN EVOLUTION IN PLANT AND SOIL HEALTH TECHNOLOGY

Detonation is a biological “First Aid” catalyst to repair soil microbial health. Detonation promotes root growth that enhances water & nutrient uptake and efficiency which translates into fewer agronomic problems.

A BIO NUTRIENT DELIVERY SYSTEM

BENEFITS

- Enhances nutrient & water uptake efficiencies
- Repairs the soil microbial nutrient delivery system
- Unlocks stored nutrients in the soil and organic matter
- Improves overall plant health reducing stress issues
- Improves effectiveness of nutrient & chemical inputs

FOR GOLF, LAWN CARE, AND LANDSCAPE APPLICATIONS

THE SCIENCE

Detonation promotes root growth and health that reduces stress and disease issues.

THE RATE

Detonation is applied at 32 ounces per acre as a spray every 6 to 8 week interval pending weather related stress issues.
