

BOOST THE PERFORMANCE OF YOUR FERTILIZER WITH **DETONATION**

Powered by The Sanctuary

DETONATION SOIL MICROBIAL BIO CATALYST IS A FAMILY OF PROBIOTICS

**BOOST SOIL
HEALTH**

**IMPROVE NUTRIENT
AVAILABILITY &
UPTAKE**

**GROW
HEALTHIER TURF**

Benefits of adding Detonation to your fertilizer or spray program:

- Builds, strengthens, stimulates below and above ground growth
- Helps to build and strengthen the turf root system
- Increases fertilizer efficiency, plant nutrient uptake and soil availability
- Reduces the effects of common abiotic stressors like drought, heat or wear
- Promotes helpful microbial population growth and improves soil structure

THE SCIENCE IS SIMPLE – Detonation increase the soil microbial populations that promote a natural sustainable approach. This reduces the amount of nutrients and water required without jeopardizing the turf health nor negatively impacting the environment.

Detonation supports sustainable turf management practices. This approach translates into increased turf quality and improves soil health. Work with your Target Turf specialist to add the economical boost of Detonation to your fertilizer blends or spray program.

Work with your Sanctuary Distributor to learn more about the economical boost of adding Detonation to your fertility or spray programs.
