

DETONATION[®]

TURF LAWN CARE PROGRAM

STRENGTHENS THE POWER OF NATURE WITH DETONATION

There are times that fertilizer applications do not deliver the expected color, growth, or performance. This is a good indication that there is a soil health and microbial life issue. By adding Detonation to your program, it improves the overall microbial populations that enhance nutrient performance. Detonation is a biocatalyst that builds microbial health to tired soils system. Detonation is a cost-effective bio-catalyst product that maximizes the effectiveness of all traditional fertilizer and pest control products.

AGRONOMIC BENEFITS

- Enhances nutrient & water uptake efficiencies
- Repairs the soil microbial nutrient delivery system
- Unlocks phosphorus & minor nutrients stored in the soil

DETONATION TURF PROGRAM

Detonation can be applied throughout the growing season. The applied rates can vary based on the seasonal turf health and weather conditions.

- **SPRING** – Apply Detonation at 16 oz per acre to wake up the soil microbes promoting and stimulating colonization
- **SUMMER** – Apply Detonation at 8 oz per acre at a 4 to 8 week interval especially during the hot summer months.
- **FALL** – Apply Detonation at 8 oz per acre to aid with heat stress, root repair and turf recovery
- **LATE FALL** – Apply Detonation at 16 oz per acre for rooting health and as a winterizer

THE DETONATION SOLUTION

Detonation is a cost-effective, safe biological “**First Aid**” catalyst to repair soil microbial health that maximizes the benefits of fertilizer and pest control products. Detonation offers a new tool to reduce input costs and enhance overall turf quality.

ECONOMIC BENEFITS

- Improves overall turf quality reducing customer complaints
- Maximizes effectiveness of all nutrient & chemical product inputs
- Reduces hot weather cancels which increase revenue opportunities

DETONATION COMBINATION TURF PROGRAMS

Detonation can be mixed with pest control products, liquid nutrients, wetting agent and growth regulator products. Plus, Sanctuary Poly Micro Blend tank mixed with Detonation delivers an enhanced color dimension and stress tolerance to your Lawn Care Turf Program. This product is applied at a rate of 16 oz per 4 to 6 weeks throughout the season. These additional products can be applied at their label rates and mixed with Detonation for a complete agronomic program.
